

XS Tools (3-1-2011)

DRAW PLAN VIEW ELEMENTS ON XS

1. Choose your Job Number & Chain.
2. Tag File -> Load -> and choose one of the following files from c:\rwd\input:
EX_ROW.AFD - Settings file for placing Existing ROW on XS's.
PROP_ROW - Settings file for placing Existing ROW on XS's.
CHAIN.AFD - Settings file for placing Chain Location (i.e. Detour) & Station on XS's.
3. Tag the ROW(s) in the middle of the dialog and choose the correct DGN file or CHAIN (As related to your job) and tag the Modify button on the Right Middle part of the dialog.
4. Tag "Draw" in the upper right corner of the dialog to run.
